● SHELF LIFE

Please meet strict expiration dates to maximize product efficiency.

- 2 year in the original sealed packaging

- 6 months after opening

INSTALLATION

● WORK ENVIRONMENT

- It is recommended to work indoors without direct sunlight and to minimize dust
- Illuminance should be as bright as possible. It is recommended to use 3 wavelength LED when using artificial light.
- The film has a good elasticity and does not affect the adhesive when your workplace is the temperature of 25° / 77°F.

● BEFORE SPREAD

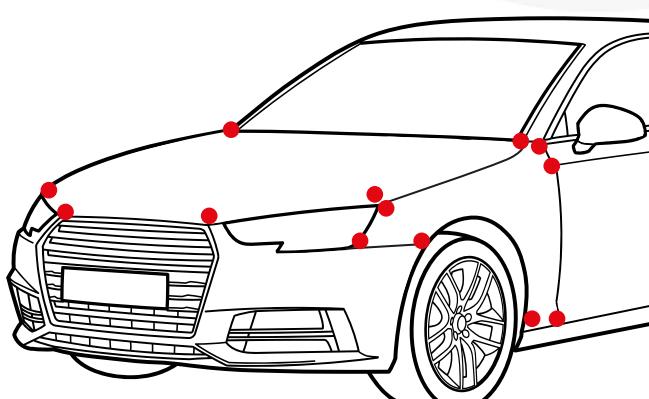

STEP.1 clean the adhesive surface to remove any remaining gel or glycerin solution used during application, using water or alcohol.

STEP.2 Ensure that the surface is completely dry.

STEP.3 Shake the bottle up and down thoroughly several times.

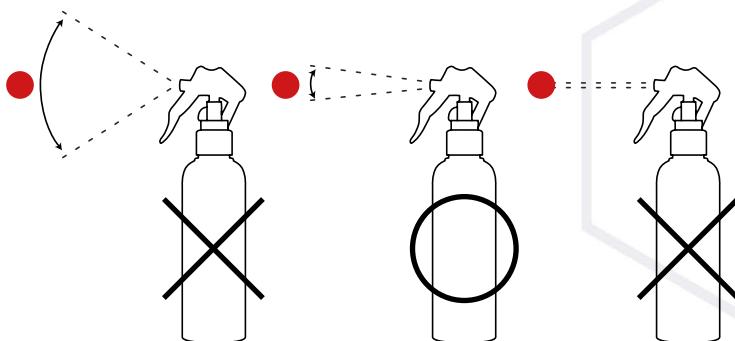

● SPREAD

STEP.4 Spray onto the adhesive surface of the area where the solution is to be applied.

Tip ①

Spray the solution only onto the adhesive surface of the application area and avoid contact with the film's topcoat surface. If the solution comes into contact with the topcoat surface, temporary haze may occur for approximately 5-10 minutes.

**Tip ②**

Adjust the spray nozzle to control the spray volume, ensuring application only to the designated areas.

**STEP.5**

After applying the solution, wait 2–3 minutes to activate adhesion.

STEP.6

Apply the film by following along the surface using your fingertips (while wearing high-heat-resistant gloves) or a square hard card with felt attached.

STEP.7

Apply heat using a heat gun at the appropriate temperature (200°C / 390°F).
